基础大纲词 精读补充词 核心重难词
常考大纲短语 核心精读短语 考点长难句

P1 ① When prehistoric man **arrived in** new parts of the world, something strange happened to the large animals: they suddenly became extinct. ② Smaller species survived. ③ The large, slow-growing animals were easy game, and were quickly hunted to extinction. ④ Now something similar could be happening in the oceans.

①当史前人类踏足世界上的新地区时，大型动物身上出现了一件奇怪的事情：它们突然灭绝了。②较小的物种则存活了下来。③那些体型庞大、生长缓慢的动物容易捕猎，很快就被猎杀殆尽。④如今，类似的情形可能正在海洋中上演。

P2 ① That the seas are being overfished has been known **for years**. ② What researchers such as **Ransom Myers** and **Boris Worm** have shown is just how fast things are changing. ③ They have **looked at** half a century of data from fisheries around the world. ④ Their methods do not **attempt to** estimate the actual biomass (the amount of living biological matter) of fish species in particular parts of the ocean, but rather changes in that biomass **over time**. ⑤ **According to** their latest paper published in Nature, the biomass of large predators (animals that kill and eat other animals) in a new fishery is reduced **on average** by 80% within 15 years of the start of exploitation. ⑥ In some long-fished areas, it has halved again **since then**.

①海洋遭到过度捕捞，这一情况为人所知已有数年之久。②而兰塞姆·迈尔斯和鲍里斯·沃姆等研究者所揭示的，正是这种变化发生的速度之快。③他们研究了全球渔场半个世纪以来的数据。④他们的方法并不试图估算特定海域中鱼类物种的实际生物量（即活的生物物质的总量），而是考察这一生物量随时间发生的变化。⑤根据他们发表在《自然》杂志上的最新论文，一个新渔场中大型捕食动物（即捕杀其他动物为食的动物）的生物量，在开发的头15年内平均减少80%。⑥在部分长期捕捞的海域，该数值自那时起再度减半。

P3 ① Dr. Worm acknowledges that these figures are conservative. ② One reason for this is that fishing technology has improved. ③ Today's vessels can find their prey using satellites and sonar, which were not available 50 years ago. ④ That means a higher proportion of what is in the sea is being caught, so the real difference between present and past **is likely to** be worse than the one recorded by changes in catch sizes. ⑤ In the early days, too, longlines would have **been** more **saturated with** fish. ⑥ Some individuals would therefore not have been caught, since no baited hooks would have been available to trap them, **leading to** an underestimate of fish stocks in the past. ⑦ Furthermore, in the early days of longline fishing, a lot of fish were lost to sharks after they had been hooked. ⑧ That is **no longer** a problem, because there are fewer sharks around now.

①沃姆博士承认，这些数字还是保守的。②原因之一是捕鱼技术已经今非昔比。③如今的渔船可以借助卫星和声呐来寻找猎物，而这些手段在50年前是没有的。④这意味着海中生物被捕获的比例更高了，因此如今与过去的真实差距，可能比渔获量变化所反映出的还要严重。⑤此外，在早年间，延绳钓上钩的鱼原本会更加密集。⑥因此，某些鱼类个体或许未被捕获，毕竟那时没有饵钩可供诱捕，这就导致对过去鱼类资源量的估计偏低。⑦再者，在使用延绳钓的早期，很多鱼在上钩后被鲨鱼夺走了。⑧如今这已不再是问题，因为周围的鲨鱼已经少了很多。

P4 ① Dr. Myers and Dr. Worm argue that their work gives a correct baseline, which future management efforts must **take into account**. ② They believe the data support an idea current among marine biologists, that of the " shifting baseline ". ③ The notion is that people have **failed to** detect the massive changes which have happened in the ocean because they have been **looking back** only a relatively short time into the past. ④ That matters because theory suggests that the maximum sustainable yield that can be cropped from a fishery comes when the biomass of a target species is about 50% of its original levels. ⑤ Most fisheries are well below that, which is a bad way to **do business**.

①迈尔斯博士和沃姆博士认为，他们的研究提供了一个正确的基准，未来的管理工作必须将其纳入考量。②他们认为这些数据支持了海洋生物学家中流行的一种观点，即“基准线漂移”的理念。③这一概念认为，人们之所以未能察觉海洋中发生的巨大变化，是因为他们回望过去的时间跨度只是相对较短的一段。④这一点很关键，因为理论指出，只有当目标物种的生物量约为其原始水平的50%时，才能从渔场中获得最大的可持续产量。⑤而大多数渔场远远低于这一水平，这种经营方式并不可取。

Q1. The extinction of large prehistoric animals is noted to suggest that_____.

例证题

[A] large animals **were vulnerable to** the changing environment

易受…的伤害

[B] small species survived as large animals disappeared

[生物物种] 幸存 消失

[C] large sea animals may face the same threat today

威胁

[D] slow-growing fish outlive fast-growing ones

作者提到大型史前动物的灭绝，是为了表明_____。

A.大型动物容易受到环境变化的影响

B.大型动物消失使得小型动物幸存了下来

C.如今大型海洋动物会面临同样的威胁

D.生长缓慢的鱼类比生长迅速的鱼类寿命更长

Q2. We can **infer from** Dr. Myers and Dr. Worm's paper that____. 推理题

推断

[A] the stock of large predators in some old fisheries has reduced by 90%

储量 捕食者

[B] there are only half **as** many fisheries **as** there were 15 years ago

像…一样，同…一样

[C] the catch sizes in new fisheries are only 20% of the original amount

最初的 数量

[D] the number of larger predators dropped faster in new fisheries than in the old

捕食者

从迈尔斯博士和沃姆博士的论文中，我们可以推断___。

A.某些老渔场的大型捕食者生物量减少了90%

B.如今渔场数量仅为15年前的一半

C.新渔场的捕捞量只有过去的20%

D.新渔场的大型捕食者数量比老渔场下降更快

Q3. By saying" 【these figures are conservative】" Dr. Worm means that_____.

保守的

词句理解题

[A] fishing technology has improved rapidly

技术

[B] the catch-sizes are actually smaller than recorded

[C] the marine biomass has suffered a greater loss

海洋的 遭受

[D] the data collected **so far** are **out of date**

迄今为止 过时的

沃姆博士指出“这些数字是保守的”，其意思是____。

A.捕鱼技术进步迅速

B.实际捕捞量比记录的要小

C.海洋的生物量遭受了更大的损失

D.目前收集的数据已经过时

Q4. Dr. Myers and other researchers hold that_____. 细节题

[A] people should **look for** a baseline that can work for a longer time

寻找,寻求

[B] fisheries should keep the yields below 50% of the biomass

产量

[C] the ocean biomass should be restored to its original level

恢复 原始的

[D] people should **adjust** the fishing baseline **to** the changing situation

适应

迈尔斯博士和其他研究人员认为____。

A.人们应当寻找一条能在更长时间内起作用的基线

B.渔场应保持鱼产量低于生物量的50%

C.海洋生物量应该恢复到原始水平

D.人们应该根据变化的形势来调整捕捞基准

Q5. The author **seems to be** mainly **concerned with** most fisheries' _____. 细节题

作者 似乎 关心，关怀；关于，与有关

[A] management efficiency

管理 效率

[B] biomass level

[C] catch-size limits

[D] technological application

运用

作者似乎主要担心大部分渔场的_____。

A.管理效率

B.生物量水平

C.捕捞量限制

D.技术应用
