【英语一】 2009 阅读 Text2

基础大纲词 精读补充词 核心重难词
常考大纲短语 核心精读短语 考点长难句

P1 ① **It is a wise father that knows his own child**, but today a man can boost his paternal (fatherly) wisdom —or **at least** confirm that he's the kid's dad. ② All he needs to do is **shell out** $30 for a paternity testing kit (PTK) at his local drugstore —and another $120 to get the results.

①再聪明的父亲也未必了解自己的孩子，但如今男人可以提高其身为人父的智慧——或者至少可以确认自己就是孩子的亲生父亲。②他所需要做的，只是到当地药店花30美元买一套亲子鉴定试剂盒（PTK），然后再花120美元获取鉴定结果。

P2 ① **More than** 60,000 people have purchased the PTKs since they first became available without prescriptions last year, **according to Doug Fogg**, chief operating officer of Identigene, which makes the over-the-counter kits. ② **More than** two dozen companies sell DNA tests directly to the public, **ranging** in price **from** a few hundred dollars to **more than** $2500.

①生产这种非处方试剂盒的Identigene公司首席运营官道格·福格表示，自去年PTK首次无需处方即可购买以来，已有超过6万人购买了这种产品。②有二十多家公司直接向公众出售DNA检测服务，价格从几百美元到2500多美元不等。

P3 ① Among the most popular: paternity and kinship testing, which adopted children can use to find their biological relatives and families can use to **track down** kids **put up for** adoption. ② DNA testing is also the latest rage among passionate genealogists —and supports businesses that offer to **search for** a family's geographic roots.

①其中最受欢迎的是亲子鉴定和亲属关系鉴定，被收养的孩子可以借此寻找自己的血亲，相关家庭也可以借此找到当年被送养的孩子。②DNA检测也是狂热的家谱研究者中最新兴起的热潮，并支撑起了一批提供寻根问祖业务的公司。

P4 ① Most tests require collecting cells by swabbing saliva in the mouth and sending it to the company for testing. ② All tests require a potential candidate with whom to compare DNA.

①大多数检测都要求在口腔内擦拭以采集唾液中的细胞，然后将样本送到相关公司进行检测。②所有检测都需要一位可供比对DNA的潜在人选。

P5 ① But some observers are skeptical. ② "There is a kind of false precision being hawked by people claiming they are doing **ancestry testing**," says **Troy Duster**, a **New York University** sociologist. ③ He notes that each individual has many ancestors —numbering in the hundreds just a few centuries back. ④ Yet most **ancestry testing** only considers a single lineage, either the Y chromosome inherited through men in a father's line or mitochondrial DNA, which is **passed down** only from mothers. ⑤ This DNA can reveal genetic information about only one or two ancestors, **even though**, **for example**, just three generations back people also have six other great-grandparents or, four generations back, 14 other great-great-grandparents.

①但也有一些观察人士对此表示怀疑。②纽约大学社会学家特洛伊·达斯特说："那些声称自己在做血统检测的人，正在兜售一种虚假的精确性。"③他指出，每个人都有许多祖先——仅仅追溯几个世纪，祖先的数量就能达到数百人。④然而大多数血统检测只考察单一世系，要么是通过父系男性遗传下来的Y染色体，要么是仅从母系传递下来的线粒体DNA。⑤这种DNA只能揭示一两位祖先的遗传信息，然而举例来说，仅仅往上追溯三代，一个人就另有六位曾祖父母；追溯四代，则另有十四位高祖父母。

P6 ① Critics also argue that commercial genetic testing is only **as good as** the reference collections to which a sample is compared. ② Databases used by some companies don't **rely on** data collected systematically but rather **lump together** information from different **research projects**. ③ This means that a DNA database may have **a lot of** data from some regions and not others, so a person's **test results** may differ **depending on** the company that processes the results. ④ **In addition**, the computer programs a company uses to estimate relationships may **be** patented and not **subject to peer review** or outside evaluation.

①批评者还指出，商业基因检测的水平，完全取决于用来比对样本的参照数据库的质量。②有些公司使用的数据库并非基于系统采集的数据，而是把来自不同研究项目的信息拼凑在一起。③这就意味着，一个DNA数据库可能在某些地区的数据非常丰富，而在另一些地区却很匮乏，因此同一个人的检测结果可能会因所使用的检测公司不同而有所差异。④此外，公司用来推算亲缘关系的计算机程序可能已获专利，不受同行评议或外部评估的约束。

Q1. In Paragraphs 1 and 2, the text shows PTK's_____. 细节题

[A] easy availability

[B] flexibility in pricing

[C] successful promotion

[D] popularity with households

文中第一段和第二段说明PTK_____。

A.容易获得

B.定价灵活

C.促销成功

D.受到家庭欢迎

Q2. PTK is used to____. 细节题

[A] locate one's birth place

[B] promote genetic research

[C] identify parent-child kinship

[D] choose children for adoption

PTK是用来____。

A.找到人的出生地点

B.促进遗传研究

C.确定父母与子女的血缘关系

D.选择收养儿童

Q3. Skeptical observers believe that **ancestry testing fails to**_____. 细节题

[A] trace distant ancestors

[B] rebuild reliable bloodlines

[C] fully use genetic information

[D] achieve the claimed accuracy

持怀疑态度的观察家认为家谱检测未能_____。

A.追踪遥远的祖先

B.重建可靠的血统

C.充分利用基因信息

D.实现其声称的准确性

Q4. In the last paragraph, a problem commercial genetic testing faces is____. 细节题

[A] disorganized data collection

[B] overlapping data base building

[C] excessive sample comparison

[D] lack of patent evaluation

最后一段提到，商业基因检测面临的一个问题是____。

A.杂乱无章的数据采集

B.重叠的数据库建设

C.过度的样本比较

D.缺乏专利评估

Q5. An appropriate title for the text **is** most **likely to** be_____. 主旨题

[A] **Fors and Againsts** of DNA Testing

[B] DNA Testing and Its Problems

[C] DNA Testing Outside the Lab

[D] Lies Behind DNA Testing

本文最合适的题目可能是_____。

A.DNA鉴定，赞成还是反对

B.DNA鉴定及存在的问题

C.实验室之外的DNA鉴定

D.DNA鉴定中的谎言
