【英语一】 2007 阅读 Text1

基础大纲词 精读补充词 核心重难词
常考大纲短语 核心精读短语 考点长难句

P1 ① If you were to examine the birth certificates (证明) of every soccer player in 2006's World Cup (世界杯) tournament (锦标赛), you would most likely find a noteworthy (引人注目的) quirk (怪事): elite (出类拔萃的) soccer players are (可能) more likely to have been born in the earlier months of the year than in the later months. ② If you then examined the European national youth teams that feed (输送) the World Cup (【体】世界杯) and professional (职业的) ranks (队伍), you would find this strange phenomenon (现象) to be even more pronounced (明显的).

①如果你去查看2006年世界杯赛所有足球运动员的出生证明，很可能会发现一个值得关注的怪现象：顶级足球运动员出生在上半年的比出生在下半年的要多。②如果你再去考察那些向世界杯和职业球队输送人才的欧洲各国青年队，就会发现这一奇怪现象更为明显。

P2 ① What might account for (对…做出解释) this strange phenomenon (现象)? ② Here are a few guesses: a) certain astrological signs (星座) confer (赐予) superior (高超的) soccer skills; b) winter-born babies tend to (往往会) have higher oxygen (氧) capacity (容量), which increases soccer stamina (耐力); c) soccer-mad parents are (可能，有倾向) more likely to conceive (怀孕) children in springtime, at the annual (每年的) peak (巅峰) of soccer mania (狂欢); d) none of (没有一个) the above.

①这种奇怪的现象该如何解释呢？②下面是几种猜测：a）某些星座赋予人卓越的足球天赋；b）冬天出生的婴儿往往肺活量更高，因而足球耐力更强；c）酷爱足球的父母更可能在春天怀上孩子，因为春天正是每年足球热的高峰；d）以上都不是。

P3 ① Anders Ericsson ([人名]安德斯·埃里克森), a 58-year-old psychology (心理学) professor at Florida State University (佛罗里达州立大学), says he believes strongly in "none of (没有一个) the above." ② Ericsson grew up (成长；长成) in Sweden, and studied nuclear (核能的) engineering (工程) until he realized he would have more opportunity to conduct (进行) his own research if he switched to (转向) psychology (心理学). ③ His first experiment, nearly 30 years ago, involved (涉及) memory: training a person to hear and then repeat a random (随机的) series (一系列) of numbers. ④ "With the first subject, after about 20 hours of training, his digit span (数字广度) had risen from 7 to 20," Ericsson recalls (回忆). "He kept improving, and after about 200 hours of training he had risen to over 80 numbers."

①佛罗里达州立大学58岁的心理学教授安德斯·埃里克森说，他坚信答案是“以上都不是”。②埃里克森在瑞典长大，起初学的是核工程，后来意识到若转向心理学，自己独立开展研究的机会会更多。③他将近30年前所做的第一个实验与记忆有关：训练一个人先听一串随机数字，然后复述出来。④“第一位受试者经过大约20小时的训练，能记住的数字长度就从7位提高到了20位，”埃里克森回忆道，“他不断进步，经过约200小时的训练后，他能记住的数字超过了80个。”

P4 ① This success, coupled (结合) with later research showing that memory itself is not genetically determined, led (导致) Ericsson to conclude (得出结论) that the act of memorizing is more of a cognitive (认知的) exercise than an intuitive (直觉的) one. ② In other words (换句话说), whatever inborn (先天的) differences two people may exhibit (表现) in their abilities to memorize, those differences are swamped (掩盖) by how well each person "encodes" (编码) the information. ③ And the best way to learn how to encode information meaningfully, Ericsson determined, was a process (过程) known as (称为) deliberate (有意的) practice. ④ Deliberate (有意的) practice entails (需要) more than simply repeating a task. ⑤ Rather, it involves (包括) setting specific (具体的) goals, obtaining (得到) immediate feedback (反馈) and concentrating (关注) as (像…一样，同…一样) much on technique as on outcome (结果).

①这一成功，加上后来研究表明记忆本身并非由基因决定，使埃里克森得出结论：记忆行为更多的是一种认知练习，而不是一种直觉活动。②换言之，无论两个人在记忆能力上表现出怎样的先天差异，这些差异都会被各自对信息“编码”的水平所掩盖。③埃里克森认定，学会有效地对信息进行编码，最好的方法就是所谓的刻意练习。④刻意练习绝不仅仅是简单地重复某项任务。⑤相反，它包括设定明确的目标、获得即时反馈，以及在关注结果的同时同样关注技巧。

P5 ① Ericsson and his colleagues have thus **taken to** studying expert performers in a wide range of pursuits, including soccer. ② They gather all the data they can, not just performance statistics and biographical details but also the results of their own laboratory experiments with high achievers. ③ Their work makes a rather startling assertion: the trait we commonly call talent is highly overrated. ④ Or, **put another way**, expert performers— whether in memory or surgery, ballet or computer programming— are nearly always made, not born.

①因此，埃里克森和同事们开始研究各类领域中表现卓越的人，其中就包括足球。②他们尽可能地收集各种数据，不仅有比赛成绩和个人经历方面的资料，还有他们自己在实验室里对这些高成就者所做实验的结果。③他们的研究得出了一个相当惊人的结论：我们通常所说的天赋，其作用被大大高估了。④或者换句话说，表现卓越的高手——无论是从事记忆或外科手术，还是芭蕾或电脑编程——几乎都是后天造就的，而不是天生的。

Q1. The birthday phenomenon found among soccer players is mentioned to_____. 例证题

[A] stress the importance of professional training

[B] spotlight the soccer superstars in the World Cup

[C] introduce the topic of what makes expert performance

[D] explain why some soccer teams play better than others

文中提到了在足球运动员中发现的生日现象，是为了_____。

A.强调专业训练的重要性

B.突出世界杯中的超级球星

C.引出“如何造就出色表现”这一话题

D.解释为什么有些球队踢得比别的球队好

Q2. The word "mania" (Line 5, Paragraph 2) most probably means_____. 词句理解题

[A] fun

[B] craze

[C] hysteria

[D] excitement

“mania”（第2段，第5行）的意思最有可能是_____。

A.乐趣

B.狂热

C.歇斯底里

D.兴奋

Q3. According to Ericsson, good memory__. 细节题

[A] **depends on** meaningful processing of information

[B] **results from** intuitive rather than cognitive exercises

[C] is determined by genetic rather than psychological factors

[D] requires immediate feedback and a high degree of concentration

根据埃里克森，良好的记忆力_____。

A.依赖于对信息进行有意义的加工

B.来自于直觉活动而不是认知活动

C.取决于基因遗传而不是心理因素

D.需要及时的反馈和高度集中的注意力

Q4. Ericsson and his colleagues believe that___. 细节题

[A] talent is a dominating factor for professional success

[B] biographical data provide the key to excellent performance

[C] the role of talent **tends to** be overlooked

[D] high achievers **owe** their success mostly **to** nurture

埃里克森和他的同事认为_____。

A.天赋是职业成功的决定因素

B.生平资料是卓越表现的关键

C.天赋的作用往往被忽视

D.高成就者将他们的成功归功于后天的培养

Q5. Which of the following proverbs is closest to the message the text tries to convey? 主旨题

[A] "Faith will move mountains."

[B] "One reaps what one sows."

[C] "Practice makes perfect."

[D] "Like father, like son."

下列谚语中，哪一项与本文想要传达的信息意思最接近？

A.“精诚所至，金石为开。”

B.“种瓜得瓜，种豆得豆。”

C.“熟能生巧。”

D.“有其父，必有其子。”
